

Exceptional Skincare Services at Coastal Plastic Surgery

*Glowing summer skin is just one appointment away
Discover Pearl Laser by Cutera*

by tammy adams

A photograph of a man in a white lab coat and a woman in a white shirt and grey skirt standing in a modern office lobby. The man is on the left, smiling, with his hands clasped. The woman is on the right, also smiling, leaning against a dark reception desk. The background shows a well-lit hallway with large windows, a potted plant, and a television mounted on the wall.

We all age, yet none of us want our skin to show the signs. For years, people have sought ways to safely and effectively rejuvenate their aging skin. Now, there is finally a way to enjoy smooth, glowing, youthful skin without the discomfort or downtime of previous methods. Coastal Plastic Surgery, the cosmetic surgery practice of Dr. Todd Adam, is pleased to offer Pearl by Cutera, a new laser to renew the skin's surface.

COMPREHENSIVE SKIN CARE SERVICES

Heidi Fell, RN, has had extensive training in skin care with certification in Intense Pulse Light/Laser, Obagi Skin Care line as well as training and certification with Botox, Restylane, Perlane, Radiesse and Juvederm. She also participates in continuing education to stay current on the latest advances in skincare. "As an RN, there are more education opportunities and I think having a nursing background and training is a wonderful benefit for our patients," she said.

Heidi received her bachelor's degree in nursing from Washington State University and spent many years working in the neonatal intensive care unit of a hospital before moving into skin care. She and her husband Eric have two young children. "I approach each patient as an individual and really listen to the things that concern them and goals they have for their skin," she said. "Then, together, we create a plan to help them achieve their goals."

COASTAL PLASTIC SURGERY: FIRST-RATE CARE, FIRST-RATE FACILITY

Dr. Adam offers a wide range of cosmetic and reconstructive surgical services in three main categories: face, breast and body. Additionally, Dr. Adam specializes in comprehensive skin care and laser hair removal. He has been in practice for 11 years in the Clear Lake area, and is well-known and respected for his courteous, caring nature as well as his surgical skills.

"I think our beautiful, state-of-the-art facility makes patients feel at ease, knowing that this is a successful practice, and it doesn't take any time at all for them to feel confident that I and my staff can meet their needs and help them achieve the look they want," Dr. Adam said. "The number one comment patients give me, is that they feel comfortable here."

Coastal Plastic Surgery is conveniently located at **1015 Medical Center Boulevard, Suite 1800** in Webster, less than a block from I-45. For more information on Dr. Adam and what Coastal Plastic Surgery has to offer, please visit our practice website at www.coastalplastic.com for a complete list of skin care products and procedures, as well as actual before and after patient pictures. Call the office today at **281-282-9300** for your complimentary consultation and let us make flawless skin a reality for you!

THE RESULTS OF AN AGGRESSIVE TREATMENT BUT WITH MINIMAL DOWNTIME

Working at one of only a handful of practices that offers the new Pearl technology, Heidi Fell, RN, who runs the skin care portion of the practice, is elated to offer it to her clients. "Pearl is the one laser to choose to renew your skin's surface with quick, visible results," Heidi said. "Pearl treats fine lines on the face and neck, uneven skin texture as well as light and dark spots caused by sun damage."

The best part about Pearl? "It has very minimal downtime, which patients love," Heidi said. "Many patients want the look of a very aggressive laser that gives great results but don't want the significant downtime that goes along with it. With Pearl, there is literally only three to four days downtime."

HOW DOES PEARL BY CUTERA WORK?

During a Pearl treatment, the top layer of skin is treated with pulses of light. A portion of the epidermis (skin surface) is gently removed and a natural protective dressing is formed on the skin's surface. And after three to four days the protective dressing peels off revealing new, healthy, vibrant skin underneath.

The Pearl laser replaces the entire top sun-damaged layer of skin with new, healthy skin. At the same time, it sends heat to deeper layers of the skin stimulating new collagen growth, filling out and decreasing fine lines and wrinkles. "It's been clinically shown that new collagen growth continues for four to six weeks post treatment so patients will continue to experience better and better results all that time," Heidi said. The combination of new skin and decreased wrinkles results in a healthier, more youthful appearance. And unlike "fractional" treatments, Pearl treats the entire face, minimizing the number of required treatments. "Typically, only one or two treatments are necessary to renew your skin," she said.
